KOMANG AYU ARISTA DEWI

Front End Developer

My journey in web development is fueled by a passion for technology and a desire to create intuitive digital experiences. As a junior developer, I am actively learning and exploring front-end technologies, with a strong motivation to transform creative ideas into functional, user-friendly web interfaces.

About Me

As a dedicated eleventh-grade student in Software Engineering at Vocational High School, I am passionate about web development and actively expanding my technical skills in front-end technologies. Currently building a strong foundation in web development, I have gained practical experience with core technologies including HTML, CSS, JS, React.js, and Tailwind CSS.
